

kamiVision

See your **store** the way your **customer** does.

AI on the cameras you already have. Cloud or edge.
Tuned to your store.

— THE OPPORTUNITY

Retailers spent the last decade installing cameras in every store. The footage is there, the cabling is in, the recordings are running — and almost none of it is ever analysed, except after something has already gone wrong. **kamiEnterprise turns the same Vision AI we've trusted in millions of homes and senior-living communities into store intelligence** — on the IP cameras you already own.

— THE PLATFORM · THREE MODULES, ONE SYSTEM

01

CONSUMER IQ

Read your floor.

Footfall & conversion

Dwell & demographics (opt-in)

Queue & fitting room

Heatmaps & journeys

02

GUARDIAN IQ

Protect your store.

Shrink & ORC patterns

Self-checkout exceptions

Restricted-zone alerts

Forensic search · no biometric ID

03

PERFORMANCE HUB

Lead from the core.

Like-for-like rollups

Vertical benchmarks

Custom KPI builder

Open API · CSV · BI

— HOW IT WORKS

Your cameras already see your store. Now they can tell you what they see.

Three modules on a single platform — running on the IP cameras you already own.

The platform.

kamiEnterprise layers AI on your existing IP cameras — RTSP, ONVIF, any vendor. Three modules, one platform: Consumer IQ for shopper insight, Guardian IQ for loss prevention, Performance Hub for the multi-site view. Signal flows into the tools you already run — POS, WMS, BI, RTLS — via open APIs and CSV exports.

Cloud or edge.

Stream to our EU-resident cloud and carry zero on-site hardware, or run a compact on-prem edge appliance where raw video never leaves the property. Latency stays low, the platform stays offline-tolerant, and the dashboards are identical either way. Mix per site as you need.

Privacy-first by design.

We work in counts and patterns, not identities — no biometric IDs, no watchlists, anonymous metrics by default. EU data residency for cloud customers; the edge option keeps every frame on-site. GDPR-aligned, with DPIA support, retention controls and a full audit trail.

— WHAT MOVES THE P&L

<p>Convert more visits</p> <p>Turn footfall into baskets, and baskets into bigger ones.</p>	<p>Cut shrink</p> <p>Stop loss earlier, with evidence-grade alerts when it counts.</p>	<p>Speed up service</p> <p>Calmer stores, shorter queues, smarter staffing.</p>	<p>Start where it matters</p> <p>One store, your KPIs, rollout on your terms.</p>
